MOTIONCRAFT FUNCTIONALITY

The core of the MotionCraft brand is the combination of easy to use functionality and incredible style. It’s mechanical motion technology paired with over 500 fabrics and 100 leathers. It is the art of comfort with the spectrum of traditional to transitional style. *All styles can be motorized.*

ZERO WALL

For many people, living space is a premium. For MotionCraft, styling and functionality are paramount. These aspects come together to create one of our most stylish, yet functional categories of seating. Our “ZERO” Wall Chairs are fully enclosed around the exterior of the frame, therefore, all the “motion” happens internally. This allows you to place the chair directly against the wall...additional wall clearance is NOT necessary. Choose from our manual incliner mechanism, offering additional seat and back pitch, and the comfort of an extended footboard. Or, choose our motorized reclining mechanism, offering you infinite positions and full recline, at the touch of the lever. Whatever your needs, MotionCraft has the chair for you!

MADE IN THE USA

Handcrafted by dedicated craftsmen...Motioncraft upholstered furniture is built in the USA. Since all materials and mechanisms meet our stringent quality standards, years of comfortable seating can be enjoyed.

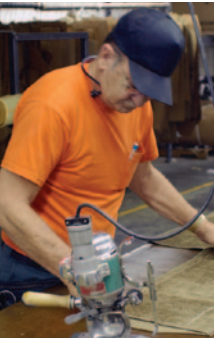

Construction starts with select hardwood components. All wood parts are carefully chosen and machined by experience craftsmen.

Select wood components are doweled, glued, screwed and hand fitted. "One piece" frame construction is utilized where necessary for improved strength.

Fabric and Leather is marked by knowledgeable craftsmen with years of experience. Attention to detail is important for proper pattern match and yield.

Close attention to cutting each individual part assures that each fabric and leather matches perfectly.

All MotionCraft sewers have years of experience dedicated to the perfection of sewing each fabric and leather component to insure proper form and fit when upholstered.

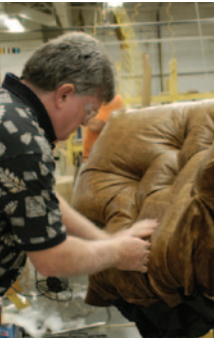

When applicable, urethane foam is used on arms and backs for the hidden comfort expected from MotionCraft.

For additional comfort and tailoring cotton fiber, produced by our own Sherrill fiber facility, is wrapped over all exposed frame components. This increases cover life by reducing abrasion.

Experienced craftsmen pay close attention to every pull, every staple, every pleat when beginning the upholstery process.

Tufting is a time honored craft which requires the highest level of experience. MotionCraft still honors this timeless art. Each button is pulled through and hand tied for the perfect tuft.

Motion upholstery experts pay close attention to exacting tolerances on all moving parts as each frame is hand trimmed.

It's all about details... details like applying nail head trim one nail at a time. Another time honored process performed by MotionCraft craftsmen with years of experience.

Quality assurance that creates a smile! Each piece of upholstered furniture is inspected to insure quality and maximum comfort. Additionally, motion pieces are tested to insure each mechanism performs correctly and smoothly.
